HUTCHINSON UTILITIES COMMISSION IS RECOGNIZED FOR RELIABLE SERVICE TO THE COMMUNITY

Hutchinson, MN 3/20/18 Hutchinson Utilities Commission has received national recognition for achieving exceptional electric reliability in 2017. The recognition comes from the American Public Power Association (www.PublicPower.org), a trade group that represents more than 2,000 not-for-profit, community-owned electric utilities.

The Association helps members track outage and restoration data through its subscription-based eReliability Tracker service and then compares the data to national statistics tracked by the U.S. Energy Information Administration for all types of electric utilities.

“This recognition helps demonstrate public power’s commitment to reliable electric service,” said the Association’s Senior Vice President of Engineering Services, Michael Hyland.

Public power has a strong track record of reliability, said Hyland. Nationwide, the average public power customer has their lights out for less than half the time, compared to other types of utilities.

“We are proud to receive this recognition. It is a testament to the hard work of all our staff to ensure that the lights stay on for all our customers,” said Jeremy Carter, General Manager at Hutchinson Utilities.

The American Public Power Association has offered the RP3 designation for 13 years now. The Association is the voice of not-for-profit, community-owned utilities that power 49 million people in 2,000 towns and cities nationwide. The Association advocates and advises on electricity policy, technology, trends, training, and operations.
