

Wind Power Participation Form

The Wind Power Program gives electrical customers the opportunity to purchase energy produced by wind turbines. For an additional charge of \$1.50 for 100 kWhs or 1 block of power, you have shown your support for wind technology and that amount of energy you choose will be produced by the turbine. You may choose as many blocks of power you desire. The term of the contract is 12 months, which will automatically renew each year, unless otherwise notified. Contract termination will be allowed mid-term when the customer is ending electric service on the contracted account.

Enter your information below and click on Submit. You may also choose to contact Nick Nelson at 320-234-0506.
