

CREATING A CLEANER ENERGY FUTURE

HUTCHINSON'S POWER SUPPLY MIX

Our diverse mix of power supply resources results in reliable, affordable and environmentally friendly electric service for Hutchinson's citizens and businesses.

Hutchinson purchases 100% clean, carbon-free energy through the purchase of Renewable Energy Certificates (RECs). RECs are proof that electricity was generated by qualifying clean and renewable facilities — such as wind and solar farms — and fed into the electric grid. These REC purchases offset the portion of your energy that comes from fossil fuels and, in effect, allows all Hutchinson Utilities Commission customers to enjoy 100% clean, carbon-free energy.

For more information about how our power supply percentages are calculated, go to mrenergy.com/energy-resources/generation.

100%

net-zero carbon power supply through purchase of RECs

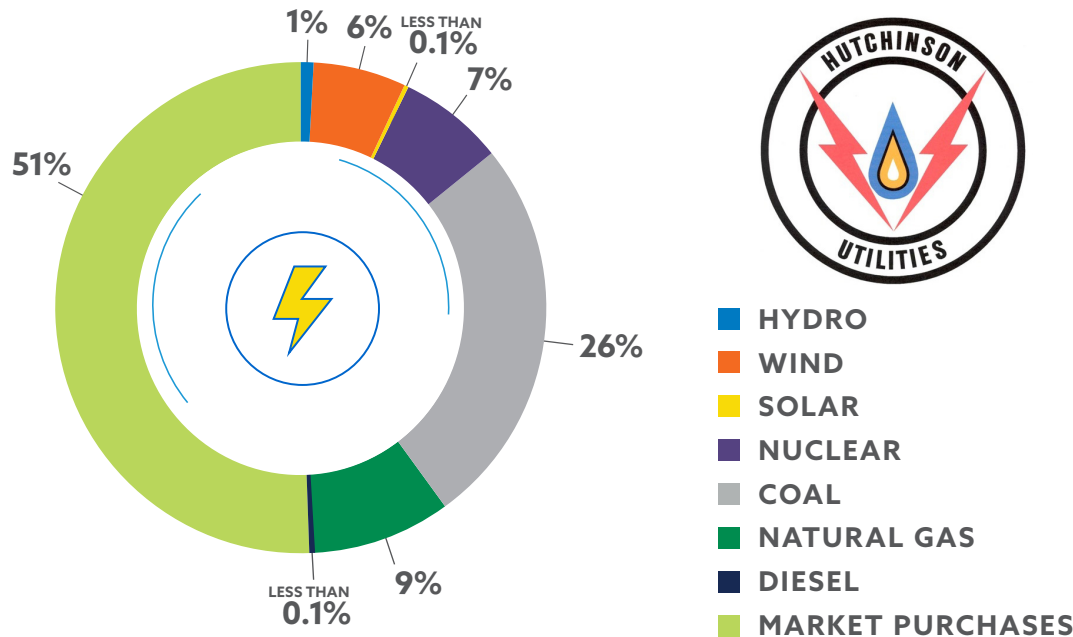

65%

carbon-free power supply without RECs

7%

renewable power supply

WHERE DOES YOUR ELECTRICITY COME FROM?

*Three-year average of 2020, 2021 and 2022.
